SUMMARY

- **Full-Stack Web & Mobile Developer:** Developed and deployed responsive websites and cross-platform mobile applications using HTML, CSS, JavaScript, PHP, React.js, and Flutter.
- **Results-Driven System Builder:** Designed and implemented systems such as Alumni Tracking and Barangay Management platforms to improve workflow efficiency, record management, and print-ready document generation.
- **Innovative Problem-Solver & AI Enthusiast:** Built an LSTM-based NLP Career Recommendation System using Python, OCR (Tesseract), and machine learning tools to deliver data-driven decision support and automation solutions.

WORK EXPERIENCE

Freelance Web & Mobile Developer January 2023 - Present

- Developed and deployed responsive websites and single-page applications (SPAs) using HTML, CSS, JavaScript, PHP, Bootstrap, and React.js.
- Built cross-platform mobile applications using Flutter, ensuring smooth performance and UI consistency.
- Integrated RESTful APIs to support dynamic features and real-time data processing.
- Collaborated with clients to gather requirements, analyze business needs, and deliver scalable, user-friendly digital solutions.

Intern Programmer August 12 2025 - November 17 2025

- Assisted in developing an Alumni Tracking System and OJT Portal by implementing key modules and workflows for managing student and alumni records.
- Programmed core features for storing, updating, and retrieving alumni and OJT information efficiently.
- Enhanced front-end usability and responsiveness using Bootstrap, improving navigation and user experience.
- Collaborated with the development team to test, debug, and improve system performance.
- Helped deliver functional systems capable of managing 500+ records effectively.

EDUCATION

Bachelor of Science in Computer Science February 2021 - December 2025
Pamantasan ng Lungsod ng Muntinlupa – Muntinlupa City, Philippines

- Built a strong foundation in computer science principles applicable to software development, system design, and technical problem-solving.

Information Communication Technology June 2017 - March 2021
Muntinlupa National High School (MNHS) – Main | Muntinlupa City, Philippines

- Completed Senior High School (ICT Strand), building a strong foundation in computer fundamentals, programming concepts, and technical problem-solving.

CERTIFICATIONS

- Python Fundamentals for Beginners – Great Learning Academy
- Python for Data Science – Great Learning Academy
- Huawei 9th ICT Competition
- 13th IT Skills Olympics
- E-ROVOUTIKA: E-ROBOT V1 Robotics Competition

FREELANCE PROJECT PORTFOLIO

Optimizing Traffic Routing Using Genetic Algorithms and Big Data Analytics

- **Smart Route Optimization:** Developed an intelligent traffic routing system using Genetic Algorithms (GA) and Big Data Analytics to generate efficient travel paths.
- **Congestion Reduction:** Minimized traffic congestion and reduced travel time by analyzing large-scale traffic datasets and detecting congestion patterns.
- **Data-Driven Recommendations:** Delivered optimized routing suggestions to improve transportation flow and support smarter traffic management.

Barangay Management System

- **Resident & Records Management:** Developed a system for resident profiling, record keeping, and document request tracking to streamline barangay operations.
- **Barangay Clearance Generator:** Implemented a feature to create, generate, and print Barangay Clearance documents for faster processing.
- **Operational Efficiency:** Reduced manual paperwork and improved accuracy in issuing official documents.

Alumni Tracking System

- **Centralized Alumni Database:** Built a system with alumni profiling, batch management, employment status tracking, and contact information updates.
- **Engagement & Communication:** Improved alumni engagement through centralized announcements, verification, and event updates.
- **Institutional Reporting Support:** Enabled efficient alumni monitoring for school reporting and graduate tracking.

Cloud-Based Decision Support System with AI-Powered Predictive Analytics for Small Business Budget Planning

- **AI Budget Forecasting:** Developed a cloud-based platform using predictive analytics to forecast expenses and income trends for small businesses.
- **Smart Financial Insights:** Generated real-time financial predictions and recommendations for better decision-making.
- **Automated Budget Planning:** Replaced manual budgeting with a data-driven automated system to reduce financial risks.

SupplySyncApp Supply & Reservation Management System

- **Developed a Flutter-based mobile app** for managing supply requests, inventory tracking, and facility reservations integrated with a PHP backend API.
- **Smart Request & Inventory Monitoring:** Implemented supply request workflows with admin/staff approvals and low-stock monitoring for better inventory control.
- **Automated Facility Reservation Workflow:** Built a reservation booking system with admin/staff review and approval features for organized scheduling.

THESIS PROJECT PORTFOLIO

LSTM-Based NLP Career Recommendation System

- Developed an AI-powered career recommendation system using LSTM, NLP, OCR (Tesseract), and GloVe embeddings in Python to generate personalized career suggestions.
- Implemented a data-driven guidance solution that matches student skills with suitable career paths and job opportunities.
- Improved career decision-making by providing personalized roadmaps, reducing reliance on manual counseling.
